

CENTURION®

LineGuard™

J-LOOP SECUREMENT DEVICE

A better way to secure IVs to reduce unscheduled restarts and complications

Prevents tension at site from accidental tugging

Designed for versatility; works on a large variety of sites, compatible with any extension set

Available in two styles: with fabric or foam base

- Securely anchors IV tubing to help stabilize site
- Helps standardize protocols for J-loop procedures
- Simple application and easy removal!
- Comfortable and conformable to skin
- Patient-friendly adhesive is gentle, yet stays firmly in place

Improper catheter securement increases the risk of phlebitis, infiltration and other related complications. Unscheduled catheter restarts cost time and money.

Secure your J-loops and reduce complications

Meets INS Standards for Catheter Stabilization

U.S. Patent No. 7,090,660
