Designed for maximal patient comfort and safety,
The Centurion Foley Anchor is a urinary catheter securement device that removes the frustration factor often experienced by caregivers and patients attempting to keep a Foley Catheter securely in place. The Foley Anchor is just one of the many innovative products from Centurion that puts the power to perform better in your hands.
**CAREGIVER BENEFITS**

- Easy to apply and remove
- Fits virtually any size catheter
- Long wear time
- Dislodgement from tugging forces is prevented

*Catheter Associated Urinary Tract Infection

**HOSPITAL BENEFITS**

- Number of insertion procedures reduced as risk of catheter dislodgement is lowered
- Dislodgement prevention reduces risk of CAUTI*

**PATIENT BENEFITS**

- Comfortable and safe
- Patient-friendly, gentle adhesive
- Stays firmly in place, allowing for easy patient movement
- Prevents catheter movement and discomfort from tugging
- Reduces risk of CAUTI*

**APPLICATION INSTRUCTIONS**

1. Cleanse and degrease adequate surface area larger than the surface area of the Foley Anchor with Alcohol Prep or per hospital protocol. Allow to dry completely.
2. Optional: Apply Skin Protectant Prep according to package directions. Allow to dry completely.
3. Position Foley Anchor under catheter at desired location (Figure A).
4. Locate arrow on base of device. Holding catheter in place, pull tab on opposite side from arrow out to create an opening in the slit. Push the tab next to arrow into this opening (Figure B).
5. Grasp both tabs and pull them in opposite directions until the first tab pulls completely through the slit and locks into place (Figure C).
6. While holding catheter in place, peel off one side of paper backing. Press to adhere to skin (Figure D). Repeat on other side.
7. Optional: Position Foley Anchor at the access valve side of the tubing bifurcation (Figure E).

**REMOVAL INSTRUCTIONS** (not shown)

1. While pulling gently on tab closest to arrow, push the opposing tab through the slit, reversing the application process. If desired, Alcohol may be used to help break down adhesive.
2. Peel the device slowly off skin.

“The Foley Anchor made the catheter tube feel secure and in place, eliminating the uncomfortable feeling of it shifting and pulling down when moving around during the day and moving around while sleeping.”
