APPLICATION

Prep well **beyond** entire dressing site according to facility protocol to ensure dressing adherence. **Allow to dry completely** (for at least 30 seconds). Note: If the prep doesn’t dry completely, the integrity and security of the dressing may be compromised. A skin protectant may be used according to preference or protocol. **Allow to dry completely.**

According to facility protocol, apply BIOPATCH® Protective Disk, blue and printed side up.

Peel paper backing off center of dressing, exposing adhesive (**Figure A**).

Handle dressing by edges to avoid adhesive contact with gloves. Turn dressing over and center over insertion site (**Figure B**). From center outward, firmly smooth entire dressing to adhere.

Slowly tear away dressing edge and the rest of the backing (**Figure C**). Smooth dressing edges to adhere.
