

Custom Designed Procedural Kits

Centurion will work with your team to design a procedural kit specifically to meet the needs of your end user. We have established relationships with thousands of suppliers and can provide a wide variety of components and packaging configurations to meet your particular requirements.

- Creates a single, consistent procedure to ensure proper technique.
- Components are placed in order of use to streamline set up and increase efficiency.
- Protect caregivers by including maximal coverage with protective gear
 - Impervious gowns
 - Caps
 - Face Masks
 - Gloves
- Protect patients by providing components needed for appropriate patient prepping.
 - Full Body Fenestrated Drapes
 - Site Prep Solutions
 - Custom labels to ensure information is communicated appropriately
- Reduce number of suppliers and inventory levels by keeping a fully stocked kit available.
