SorbaView® SHIELD is a one-step catheter securement system that combines the features and benefits of a SorbaView dressing with Shield Technology.

APPLICATION

Prep well beyond entire site according to facility protocol. Allow prep to dry completely. This usually takes less than one minute.

Remove larger liner without touching adhesive. Align catheter with lower edge of window. Press to adhere to catheter and skin (Figure A).

Without removing the liner, slip the closure piece under tubing and over edge of dressing as far as possible (Figure C). Remove the liner one side at a time and smooth down to adhere.

Remove small liner. Adhere dressing to skin. Guide tubing out through center notch and overlap the edges to form a seal (Figure B).

Locate v-notch on outer edge of closure piece and pull apart in opposite directions to break center perforation (Figure D).

Pull apart completely (Figure E). Optional: A tape strip may be used to secure catheter tubing during removal (Figure E).

Holding the catheter in place, gently peel back closure piece and dressing together as one. Peel back slowly, keeping dressing close to the skin, following catheter toward insertion site (Figure F).

SorbaView SHIELD and SHIELD Technology are the proprietary property of Centurion Medical Products. SorbaView SHIELD is only available in sterile individual packs or sterile trays manufactured by Centurion Medical Products.
